THE ONLY UK-RECOMMENDED CLEARFIELD

KEY TRAITS

VIGOROUS ESTABLISHMENT

Robust initial root and shoot growth for the most reliable and even establishment.

RAPID AUTUMN DEVELOPMENT

Faster-than-average development for the most rapid growth away from flea beetles and other autumn challenges.

DOUBLE PHOMA RESISTANCE

RLM7 supported by polygenic resistance for the most durable phoma/stem canker protection and greatest spraying economy & flexibility.

CLEARFIELD

Conventionally-bred resistance to Clearfield™ herbicides for the most effective control of cruciferous weeds and non-Clearfield OSR volunteers.

POD SHATTER RESISTANCE

Pioneering genetic resistance to pod shattering for the least seed shedding up to and at harvest and the greatest flexibility in harvest timing.

BREEDER'S VIEW

DK IMPRINT CL stands out as the only Clearfield variety with UK-wide Recommendation and the only Clearfield on the RL with pod shatter resistance. In addition to the established range of DEKALB yield-protecting traits, ADAS screening suggests it has some tolerance to verticillium.

MANAGEMENT GUIDANCE

Seed rate should target an even plant stand of 25-30 plants/m² in spring.

Ensure the Green Area Index is accurately determined at the start of spring growth to guide appropriate nitrogen rates for optimal canopy size. A PGR at early green bud may be appropriate to reduce crop height.
